To whom it may concern

Herewith confirmation that Civil & Power Generations Projects (sub-contractor of MHPSA) executed their work scope on the Medupi Power Plant project as required by MHPSA and Eskom:

- In a very professional and client orientated manner.
- In accordance with client requirements, standards, codes and specifications.
- In accordance with safety requirements and standards.
- Worked hand in hand with our engineering department to conclude technical queries.
- Provided sufficient designs for approval which was technically and practically more sufficient, time and cost saving.
- Was very well equipped and organised.
- Issued MHPSA with above standard documentation/reporting in relation with planning, QA/QC, Operations, Construction, Safety, Engineering and Materials Control.
- Can work under pressure to meet dead lines in short time frames.
- Provided final validated data books on time without any constraints.

I would highly recommend Civil & Power Generations Projects and their capable team for any future projects.

Edwin Smith
